

NIDDK

2006 Urolithiasis Symposium

March 9–10, 2006

Wyndham Baltimore Inner Harbor
Baltimore, MD

Goals of the Symposium:

- To identify gaps in knowledge in the:
 - evidence for the available preventive strategies and frequency of their use in the clinical setting
 - evidence for the evaluation and treatment of patients with urolithiasis in the acute and chronic settings
 - pathogenesis of crystal/stone formation at the cellular level
- To develop recommendations for NIDDK for important areas of future urolithiasis research.
- To attract new investigators to the field of nephrolithiasis with the hope that innovative thinkers and approaches will lead to fundamental and clinically important discoveries, ultimately leading to a reduction in the burden of disease.

Planning Committee:

Gary Curhan, Chair
Leroy M. Nyberg, Jr.
David S. Goldfarb
John Lieske
Dawn S. Milliner
Orson Moe

Glenn M. Preminger
Martin I. Resnick
Cheryl Scheid
Michael D. Ward
Elaine Worcester
